ABOUT ME

Passionate about technology, innovation, and problem-solving. I'm dedicated to learning and exploring research in areas like communication systems, networking, and data-driven technologies. Always eager to grow and collaborate on meaningful projects.

EDUCATION

Bangladesh University of Professionals	2024 – 2027
<i>Bachelor of Science in Information and Communication Engineering</i>	<i>CGPA 3.78</i>
Rajuk Uttara Model College	2022 – 2023
<i>Higher Secondary Certificate</i>	<i>GPA 5.00</i>
Natore Govt. Girls' High School	2020 – 2021
<i>Secondary School Certificate</i>	<i>GPA 5.00</i>

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Human Resource Coordinator	2026
<i>IEEE BUP Student Branch</i>	<i>Sub-Executive Committee</i>
Content Management Coordinator	2026
<i>IEEE BUP Student Branch, WIE Affinity Group</i>	<i>Sub-Executive Committee</i>

ACHIEVEMENTS

Scholarships: PSC (2015), JSC (2018), SSC (2021) — Talent Pool (Government of Bangladesh Board Scholarships)

Competitions: IT Olympiad; IEEE BranchFest 2025 (Participant); Bangladesh Mathematical Olympiad 2019 (Regional Round)

PROJECTS

Elderly Care & Emergency Alert System | *Python, Flask, HTML, CSS, JavaScript, MySQL*

- Developed a database-driven web application to enhance the safety and health management of senior citizens
- Implemented emergency alert mechanisms to enable timely assistance during critical situations
- Integrated health tracking and communication features for monitoring elderly users and connecting them with caregivers
- Designed and managed a MySQL database for storing user, health, alert, appointment, and prescription data

Study Planner | *Java, Swing*

- Developed a study management application to help students organize and manage their academic routines
- Implemented to-do lists and personalized routines for structured study planning
- Integrated mood-based playlist functionality to support different study moods
- Added time-tracking features to monitor study sessions and improve time management

CPU Scheduling Simulator | *Python, Flask*

- Developed a GUI-based CPU Scheduling Simulator for visualizing and analyzing process scheduling algorithms
- Implemented FCFS, SJF, SRTF, Priority, and Round Robin scheduling algorithms
- Generated Gantt charts to visualize process execution and scheduling order
- Calculated scheduling performance metrics including Completion Time, Turnaround Time, Waiting Time, and Response Time

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres, MySQL), JavaScript, HTML/CSS, MATLAB

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, PyCharm, Apache NetBeans, CodeBlocks

Libraries: Pandas, NumPy, Matplotlib

Other: GitHub, Git, LaTeX-Overleaf
